PROFESSIONAL SUMMARY

Full Stack Developer in training, with experience in developing modern web applications. On the Frontend, I build responsive and interactive interfaces using **React**, **TypeScript**, **JavaScript**, **HTML5**, and **Bootstrap**. On the Backend, I have a solid foundation in **Node.js**, **Express**, **Python**, and **Django**, with experience in creating RESTful APIs and data modeling. I also have experience with version control and systems integration. I seek to contribute to the development of scalable and efficient solutions, applying clean code practices and agile methodologies.

TECHNOLOGIES AND SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python (3.10+), SQL.
- **Frontend:** React, HTML5, CSS3, Bootstrap.
- **Backend:** Node.js, Express, Django, Django REST Framework (DRF).
- **Databases:** PostgreSQL, SQL Server, MySQL.
- **Quality & Tools:** Git/GitHub.
- **Soft Skills:** Teamwork, Problem Solving, Assertive Communication, Analytical Thinking.

PROJECTS

Sim, Aceito (Wedding Management System) | Technical Course Capstone Project

[View on GitHub](#)

Complete web application for event and ceremonialist management, developed as a practical solution with an architecture similar to professional environments.

- **Systems Integration:** Environment integrating services such as Django and PostgreSQL.
- **Dynamic Frontend:** Used HTMX to create fluid interactivity (SPA), reducing Frontend complexity.
- **Business Modules:** Integrated development of Budget, Contract, and Calendar modules with complex logical dependencies.

Asset Management | Dress To

[View on GitHub](#)

System developed for the control and management of factory assets.

- **Tech Stack:** Full Stack development using React / HTML and CSS on the Frontend and Node.js / Python on the Backend, integrated with the company's SQL Server database.
- **Control and Tracking:** Focused on optimizing the tracking, organization, and management of internal resources and company equipment.
- **Data Extraction:** Elaborate data structuring to facilitate queries and the generation of management reports for the operational team.

Invoice and Due Date Control | Dress To

[View on GitHub](#)

Web platform created for rigorous control of deadlines and fiscal documents.

- **Tech Stack:** Web application built with Django / React, featuring advanced data manipulation and direct connection to SQL SERVER.
- **Routine Automation:** Developed integrations and automated data exchange between the web interface and corporate Excel spreadsheets.
- **Financial Monitoring:** Assists in financial organization through continuous monitoring of invoices and issuance of deadline alerts.

MeteoHUB

[View on GitHub](#)

Interactive real-time weather search website.

- **Tech Stack:** Dynamic interface developed with React, TypeScript, and CSS, along with additional libraries.
- **RESTful API Consumption:** Asynchronous integration via HTTP requests to provide updated meteorological data from external services.
- **User Experience (UX):** Clear and responsive visual presentation of weather conditions, ensuring easy usability and quick data visualization.

PROFESSIONAL EXPERIENCE

Dress To

March 2025 – Present

IT Apprentice

- Maintenance and development of features for internal systems and technical support on the VTEX platform.
- Management and manipulation of SQL Server databases, performing queries for management report extraction.
- Development of automated integrations and data exchange between corporate systems, e-commerce platforms, and Excel spreadsheets.

Assaí Atacadista

February 2023 – June 2024

Cashier Apprentice

- Direct customer service and efficient payment processing.
- Responsible for cash verification, ensuring the integrity of daily closing.

EDUCATION

Systems Analysis and Development

In Progress

UNIASSELVI

- Undergraduate degree focused on software engineering, project management, and systems development.

Technician in Systems Development

Completed: Dec/2025

Firjan SENAI São Gonçalo

- Professionalizing course with a practical focus on the software development lifecycle.
- **Competencies:** Programming Logic, Node.js, Python, Django, REST APIs, OOP, Database Modeling, Software Architecture, and Agile Methodologies.
